

# State Street Short Term Investment Fund

Fact Sheet  
Defined Contribution

31 December 2025

State Street Short Term Investment (STIF) Fund (the "Fund") represents units of ownership in the State Street Short Term Investment Non Lending Series Fund.

The Fund seeks to offer safety of principal and a competitive yield to maximize current income.

## Investment Objective

The Fund seeks to provide safety of principal, a high level of liquidity and a competitive yield.

The Fund is not a "money market fund" registered with the U.S. Securities and Exchange Commission ("SEC"), and is not subject to the various rules and limitations that apply to such funds. Although a Fund may seek to maintain a stable or constant net asset value, there can be no assurance that it will do so.

## Investment Strategy

The Fund invests principally in high quality, short-term securities and other instruments including, but not limited to, U.S. Treasury bills, notes and bonds, other obligations issued or guaranteed as to principal or interest by the U.S. Government, its agencies or instrumentalities, corporate debt obligations (including commercial paper of U.S. and foreign companies), instruments of U.S. and foreign banks, including time deposits (including Eurodollar Time Deposits), certificates of deposit (including Eurodollar and Yankee Certificates of Deposit) and banker's acceptances, supranational and sovereign debt obligations (including obligations of foreign government subdivisions), mortgage-backed and asset-backed securities, repurchase agreements, funding agreements, money market mutual funds subject to SEC Rule 2a-7, and other investment pools (including those managed by State Street Investment Management and its affiliates) that State Street Investment Management determines to be consistent with the Fund's investment objective. All securities held by the Fund are U.S. dollar denominated.

The Fund may concentrate its investments in one or more industries or groups of industries, such as investments in obligations of U.S. or non-U.S. banks. Investments made by the Fund may satisfy some, but not necessarily all, of the quality, maturity, and diversification requirements set forth in Rule 2a-7 under the U.S. Investment Company Act of 1940. For example, the dollar-weighted average maturity and dollar-weighted average life of the Fund will not normally exceed 60 days and 120 days, respectively, and the maximum expected average time to receipt of principal of any single security purchased by the Fund will not normally exceed 397 days. The Fund will not invest in a security or other investment unless State Street Investment Management determines at the time of investment that it presents minimal credit risk. The Fund is not required to comply with the requirements of Rule 2a-7 and thus, does not incorporate all of the requirements of Rule 2a-7, such as, for example, requirements as to liquidity, board reporting, certain periodic testing requirements, and requirements for certain reports to the SEC, as well as certain substantive limitations on investments contained in Rule 2a-7.

The Fund will not typically engage in transactions involving derivatives, although it may purchase securities in which options or other derivatives are embedded. The Fund would not purchase those securities for purposes of creating what State Street Investment Management considers to be investment leverage. (State Street Investment Management generally will determine whether an investment has the effect of creating investment leverage by evaluating the effect of the investment on the exposure and risk profile of a Portfolio as a whole.)

Portfolios managed using the Fund are expected typically to issue and redeem shares at a "book value" of \$1 per share. Portfolios managed using the Fund are not registered money market funds, and may continue to issue and redeem shares at book value under circumstances where a registered money market fund might not, such as when the variation between book value per share and market value per share exceed levels permissible for a registered money market fund to issue and redeem shares at \$1 per share. State Street Investment Management may at any time (without

This Fact Sheet provides summary information about the Fund. It should be read in conjunction with the Funds' applicable Strategy Disclosure Document, and the documents reference therein, which are available from your Plan Administrator. notice to investors) cause a Portfolio to issue and redeem shares at their market value, rather than their book value.

State Street Investment Management may implement the Fund's asset allocations through investments in other investment vehicles. These will typically include investment pools (which may, but will not necessarily, be registered under the U.S. Investment Company Act of 1940, as amended) managed or sponsored by State Street Investment Management or an affiliate. Because of the unit issuance processes employed by the various underlying investment pools, allocations by the Fund to certain pools on a given trading day may be invested in such pools at the next trading day's net asset value per unit. This will result in the portion of the Fund's assets being invested in such investment pools being held in cash for the trading day and may result in increased active risk. This could adversely impact the return to any investor.

The Fund is a collective investment trust managed by State Street Global Advisors Trust Company (SSGA), and is not a mutual fund. The Fund is not FDIC insured, nor is it an obligation or deposit of, or guaranteed by State Street Corporation, State Street Investment Management or its affiliates.

The ICE BofA 3-Month U.S. Treasury Bill Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date. While the index will often hold the Treasury Bill issued at the most recent 3-month auction, it is also possible for a seasoned 6-month Bill to be selected.

**Distribution Calculations:** (Security Distribution, Quality Distribution, and Sector Distribution) are measured on a trade date basis and exclude uninvested cash from the market value used to compute the percentage calculations.

1 Week Liquidity represents cash (including time deposits), direct obligations of the U.S. Government (e.g., Treasury securities), discount notes of certain U.S. instrumentalities with remaining maturities of 60 days or less, and securities (including repurchase agreements) that will mature or are subject to a demand feature that is exercisable and payable within five business days.

Next Business Day or Overnight Liquidity represents all securities maturing the next business day, U.S. Treasury securities, as well as uninvested cash balances

Certain supplemental information may be rounded and may result in the total not adding up to 100.

The top holdings are presented to illustrate examples of the securities that the Fund has bought and may not be representative of the Fund's current or future investments. In the case of fixed income and cash funds the securities are aggregated and shown at the issuer level. The top holdings do not include other assets or instruments that may be held by the Fund including, for example and not by way of limitation, cash or cash equivalents and derivatives such as futures, options and swaps. The figures presented are as of the date shown above, do not include the Fund's entire investment portfolio, and may change at any time.

Characteristics are calculated using the month-end market value of holdings of the representative account, and where averages are shown these reflect the market weights of the securities in the representative account. For beta and standard deviation, these reflect Composite month-end returns. Characteristics are as of the date indicated, are subject to change, and should not be relied upon as current thereafter.

### Important Message About Risk

Investing involves risk including the risk of loss of principal. Bonds generally present less short-term risk and volatility than stocks, but are subject to: interest rate risk (as interest rates raise, bond prices usually fall); issuer default risk; issuer credit risk; liquidity risk; and inflation risk. These effects are usually more pronounced for longer-term securities. Any fixed income security sold or redeemed prior to maturity may be subject to a substantial gain or loss. Investing in foreign domiciled securities may involve an increased risk of capital loss from unfavorable fluctuation in currency values, withholding taxes, differences in generally accepted accounting principles and economic or political instability in other nations. In addition, the Fund may use derivative instruments which may involve additional risks

such as potential illiquidity of the markets, credit risk, currency risk, leverage risk and counterparty risk.
